April 2024
December 2023

Developed an e-commerce frontend website for a jewelry company, enabling users to browse and order jewelry products seamlessly.

Developed *Talewhirl*, a book social platform where users can read, write, connect with authors, follow favorites, and comment on books to enhance engagement.

September–November 2024

Projects

- **TaleWhirl** – A Fullstack web application with an engaging book social community where users can read, write, connect with authors, and enhance their experience by following favorite authors and commenting on books. Implemented interactive features to foster a dynamic reader-author community
- **Runnerz** – A backend server where users are able to track physical activities and document their progress.
- **Deliciousss** – Developed a food recipe app enabling users to explore global cuisines, view detailed recipes, and watch video tutorials for step-by-step food preparation.
